1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/13898 to Stack for the reasons set forth in the prior Office action.
3. Applicant's arguments filed 3/5/04 have been fully considered but they are not persuasive. Applicant argues that "substantially 25%" rejection is only with reference to the fibers and not to the capillaries themselves. However, since Stack states that the cross section of the filament is induced by the cross-section of the hole in the spinnerette, then the reduction of "substantially 25%" of the cross section area would be mirrored by the capillary structure. See page 3, second to the last paragraph. With regard to drawing the fibers while they are still plastic, see page 5, first paragraph, which teaches that the fibers are drawn and tensioned immediately upon leaving the hole. With regard to quenching the fibers, see page 8, last paragraph through page 9, first three paragraphs.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

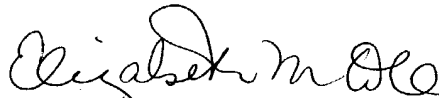

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
